

**MAXON OVENPAK® LE Burners**

**Honeywell**

**Low emissions, high performance  
natural gas burners**

# Introducing the Maxon OVENPAK® LE (low emissions) burner series - the smart choice for a variety of industrial, direct and indirect fired applications.

OVENPAK LE burners are nozzle-mixing gas burners for use where clean combustion and high turndown are required. The burners are simple and versatile for use on a variety of heating applications.

The compact, unique design of the Maxon OVENPAK LE provides simple operation and adjustment through its operational range.

The balanced pressure feature also makes OVENPAK LE resistant to firing chamber pressure fluctuations. As gas flows through the nozzle and along the inside of the burner cone, combustion air is rapidly mixed with the fuel and produces a wide turndown range with a highly stable flame.

**Typical applications include:**

- Paint finishing lines
- Metals and metal finishing
- Air heating for ovens and dryers
- Paper and textile machines
- Food baking ovens
- Coffee roasters
- Grain dryers

# Maxon OVENPAK® Complete Burner Series

Known for their reliability, performance and value, the Maxon OVENPAK burner series is the smart choice for a variety of industrial, direct and indirect fired applications that require high turndown. The complete OVENPAK burner series offers exceptional performance in a variety of applications.

## Maxon OVENPAK LE Series Burners

Available in 4 new sizes.  
 Burns any clean fuel gas.  
 Meeting many air quality standards for NOx and CO.  
 Compact burner design provides quick and easy installation.  
 Balanced pressure design for easy commissioning and adjustment.  
 Visible ignition action speeds commissioning and maintenance.  
 High turndown for exceptional process control.

### Provides application flexibility with:

- Turndown of 25:1 to 100:1
- Heat releases to 10,000,000 Btu/hr

## Maxon OVENPAK 500 Series Burners

Burn clean fuel gases, light oils, or both simultaneously.  
 Provides stand-by or alternate fuel capabilities.  
 Gas-only version converts easily to combination fuel firing.  
 Low horsepower requirements reduce initial and operating costs.  
 Uses compressed air for oil atomization.  
 Compact design for easy installation and maintenance.

### Provides application flexibility with:

- Turndown up to 20:1
- Heat releases to 10,500,000 Btu/hr
- Over 40 different styles and sizes
- Cost-effective external blower (EB) version

\*Pilot only, compressed air on, Natural Gas

## Maxon **OVENPAK 400 & OVENPAK II®** Series Burners

Burns any clean fuel gas.

Fires into passing air streams.

Requires only low pressure gas.

Simple field adjustment and maintenance.

Modular burner design provides easier installation – OVENPAK II.

Compact burner design provides quick and easy installation – OVENPAK 400.

### Provides application flexibility with:

- Turndown of 20:1 to 70:1
- Heat releases to 16,500,000 Btu/hr
- Cost-effective external blower (EB) version
- Over 16 different styles and sizes – OVENPAK II
- Over 90 different styles and sizes – OVENPAK 400
